

Grill Anything. Anywhere. Anyhow.

The Wyze Temp Fire monitor provides a local LED display along with WiFi and Bluetooth connectivity to mobile devices while reading a wireless food probe inside the grill, oven, or rotisserie. When grilling with charcoal or wood, an optional Bluetooth connected draft fan can be installed in the lower part of the grill to maintain a precise grill cook temperature.

Hub Specs

Connectivity

WiFi

Bluetooth

Temperature Range

-40C up to 85C

Smarts

Open Lid Detection (optional)

Auto-shutoff

Weight and Dimensions

260g

3.75" diameter x 1.25" depth

Length, including antenna: 9.75"

Local Display

Super bright, discrete, individual LEDs provide both grill and probe temperature throughout the cook process in C or F

Power

Runs on 4 AA batteries (included)

3-12VDC Power Supply (optional)

Probe

Batteryless

Wireless

Dishwasher Safe

Temperature Range

Handle (exposed to ambient grill temps) -10C up to 260C

Probe Tip (inside meat): -10C to 120C

Weight and Dimensions

9g

Insertion Diameter: 0.2"

Length: 6.5"
