Cook each product to the right temperature, every time.

- Reduce risk of food-borne illness and expensive lawsuits
- Reduce cook time and improve yield with more accurate, individualized readings
- Improve customer satisfaction and trust
- Continuous cooking operation —no interruption of cook process to measure product temperature

Improve reporting compliance and efficiency automatically.

- Live monitoring display
- Receive daily usage and compliance reports on the cloud
- Save time and eliminate manual data entry error with automated, probe-specific readings
- Automatically create cook reports and food safety reports in seconds
- Secure, encrypted data prevents probe loss
