

Wireless Temperature Probe

Maximum tip temperature: 212°F	Maximum handle temperature: 700°F
Transmit interval:	1-60 SEC
Maximum cook time:	Up to 48 HOURS
Accuracy:	+/- 0.5°F TYP +/- 1.4°F MAX
Ambient:	+/- 10% 200-400°F

Product Family Engineered For:

- Restaurant Industry
- Grill Manufacturers
- OEM Oven Manufacturers
- Grocery Retailers

Patented Tip-Charging design allows:

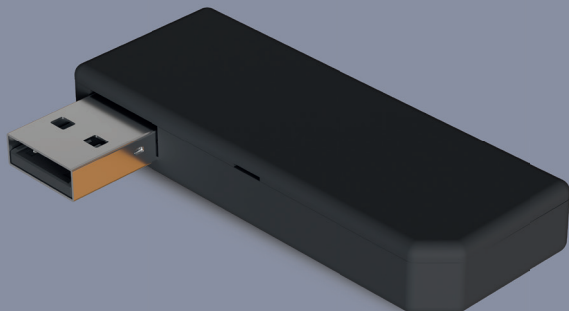

- ①

Auto-Calibration
- ②

Easy Cleaning
- ③

Auto-Pairing for Multi-Oven Operations

OEM Reader (USB Dongle)

Features:

- Configurable
- High Gain Antenna Available
- Programmable outputs allow for Cook/Hold oven control
- Connectivity Options include
 - I2C
 - Serial
 - TTL
 - Bluetooth

Oven Mounted Charger

Features:

- Dishwasher Safe
- Reversible
- Simple 5V input
- Magnetically Attached
- Includes Mounting Plate

Cook each product to the right temperature, every time.

- Reduce risk
- Reduce cook time
- Improve yield
- Improve customer satisfaction and trust
- Continuous cooking operation

Safe and easy to use, by anyone.

- Sensors at multiple depths ensure that the coldest part of the product is measured
- Can fit the design, look and feel of any rotisserie, combi, cook and hold, or BBQ oven
- Dishwasher safe
