

Small System Charger

Charging Station for Chef Display Hub & Wireless Probes

P/N	TP2920
-----	--------

Overview & Features

- Charges up to four (4) wireless temperature probes and one (1) Chef Display Hub at the same time.
- Accepts standard USB power input, making it compatible with common wall adapters, power banks, and computer USB ports.
- Delivers regulated low-voltage DC output tailored to each device type — probes and Chef Display Hub charge safely at their own respective voltages.
- Durable acetal housing with stainless-steel contacts resists wear from repeated daily charging cycles in a commercial kitchen environment.
- Designed to be wall mounted.

Materials

Acetal and stainless steel.

Environmental & Hazardous Materials

RoHS, REACH

Specifications

Input	USB 5VDC, 2.1A minimum
Output	2.4VDC to probes; 5VDC to Chef Display Hub
Charging Capacity	Up to 4 wireless probes and 1 Chef Display Hub
Size	137 x 104 x 120 mm (5.4 x 4.1 x 4.7 in)
Weight	400 g (14 oz)
